cycling capability«

Industrial Batteries

The powerful range of Network Power

Energy storage solutions for critical systems that require uninterrupted power supply. GNB® Industrial Power offers powerful batteries for your individual needs. The below table is only indicative and depends on customers' specific applications. For more information please ask a GNB sales representative.

The GNB Network Power brand overview

ABSOLYTE® **MARATHON®** > VRLA batteries (Valve Regulated Lead Acid) in which the electrolyte is fixed in an absorbent glass mat (AGM)
Sprinter® **Powerfit®** > Excellent high current capability
 > Very economical
 > Maintenance-free (no topping up)

Sonnenschein® > VRLA batteries (Valve Regulated Lead Acid) in which the electrolyte is fixed in a gel (dryfit technology)
 > Inventor of Gel technology
 > Highest reliability, even in non-optimal conditions
 > Particularly suitable for cyclic applications
 > Maintenance-free (no topping up)

Classic® > Conventional lead-acid batteries with liquid electrolyte
 > Extreme reliability, proven over decades
 > Low maintenance

> Further information about service is available on page 10

Classic OCSM

Safe energy storage for stationary battery systems

The Classic OCSM range is an enhanced development of the OPzS series which uses the CSM (Copper Stretched Metal) patent, developed by HAGEN Batterie AG in 1978. This patent, originally created and implemented for submarine batteries, has been successfully adapted for stationary applications where remarkable energy transformations or short-term discharges are required.

In addition to the positive tubular plates providing extreme stability and robustness, the unique feature of the OCSM range is the use of a copper stretch mesh as the core of the negative electrode. The higher conductivity of copper leads to a lower internal resistance and provides a much better performance during the discharge and charge of the battery. The main applications of OCSM batteries are power plants (approved for use in nuclear power plants) and load levelling.

Your benefits:

- > **High current discharge capability** – enhanced power output
- > **Very long float life, high power and excellent cycling endurance** – unique design
- > **Low maintenance effort** – saving costs
- > **Completely recyclable** – low CO₂ footprint

Specifications:

- > Nominal capacity 160 - 3480 Ah C₁₀
- > 20 years design life and service life at 20 °C ambient temperature (80% remaining capacity from C₁₀)
- > Positive tubular plate and negative CSM (copper) plate technology
- > Double separation with microporous and corrugated separators
- > HAGEN Patentpol permanent sealing, female threaded terminals with copper insert
- > Side protection of the plates
- > Container made from high quality transparent plastics; tempered
- > Flame arresting ceramic funnels according to DIN 40 740 available on request
- > Also available in dry charged condition with separate electrolyte
- > Dimensions according to DIN 40746-1
- > Approval of the German nuclear standard: KTA 1401 for the factory and KTA 3703 for the product range
- > Complies with the international standard IEC 60896-11
- > Low gassing due to antimony alloy < 3% (EN 50272-2)
- > Manufactured in Europe in our ISO 9001 certified production plants

20 years design life

Battery Service – Energy Solutions

Keeping your business on the move

GNB® is the Expert

Who could do this job better than the professionals of a company with more than 100 years of experience in battery development, production and application?

Leave the responsibility for the maintenance of your batteries and chargers to the professionals: a GNB service contract provides you with exceptional economic advantages through time savings, cost savings and safety!

Installation of Batteries and Systems for Network Power

- > Development of complete turnkey solutions from the design concept to installation and commissioning.
- > Installation according to legal and safety regulations including CE certification by approved installation technicians.
- > Training and certification of external installation technicians according to CE regulations.

- ✦ Inspection Contract
- ✦ Maintenance Contract
- ✦ Lifetime Warranty Contract
- ✦ Full Service Contract

»GNB Service – individualized, professional and all over Europe!«

Exide Technologies, with operations in more than 80 countries, is one of the world's largest producers and recyclers of lead-acid batteries. Exide Technologies provides a comprehensive and customized range of stored electrical energy solutions. Based on over 120 years of experience in the development of innovative technologies, Exide Technologies is an esteemed partner of OEMs and serves the spare parts market for industrial and automotive applications.

GNB Industrial Power – A division of Exide Technologies – offers an extensive range of storage products and services, including solutions for telecommunication systems, railway applications, mining, photovoltaic (solar energy), uninterrupted power supply (UPS), electrical power generation and distribution, fork lifts and electric vehicles.

Exide Technologies takes pride in its commitment to a better environment. An integrated approach to manufacturing, distributing and recycling of lead-acid batteries has been developed to ensure a safe and responsible life cycle for all of its products.
